# FORMER PLAINWELL, INC. MILL PROPERTY
PLAINWELL, MICHIGAN

This Remedial Action Fact Sheet has been prepared to provide local residents with an overview of the Remedial Action at the Former Plainwell, Inc. Mill Property (the Site), which is being conducted by Weyerhaeuser (the Responsible Party) under the oversight of the United States Environmental Protection Agency. Monthly status updates will be prepared for the Site during active working months. This Fact Sheet and the monthly status updates are being prepared as part of Weyerhaeuser's commitment to keeping the community informed and knowledgeable about the project activities.

- The Remedial Action is being conducted by Weyerhaeuser in accordance with the Record of Decision (ROD) and approved Remedial Action Work Plan for soils at the Site.

- The U.S. EPA is providing oversight for the activities, with support from the Michigan Department of Environmental Quality (MDEQ).

- Work will include the removal and off-Site disposal of soil and debris impacted with metals, polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls, and benzene above the cleanup levels. Sampling will be done to verify that the cleanup levels for the Site have been met after impacted materials are removed. Areas where impacted soil and debris have been removed will be backfilled with clean soils. Areas to be removed are shown in the below drawing.

- Air monitoring will be completed during the work to ensure that workers and the nearby community are safe during the work, and water will be used on-Site to keep dust down.

- The Remedial Action for the Site is scheduled to be conducted between August and December 2018, with a winter break between December 2018 and March 2019. Additional work will be completed between March and May 2019. Working hours are 7 am to 5 pm, Monday through Friday, and 8 am to 5 pm Saturday. No work will be performed on Sundays or holidays. Trucks will be entering and exiting the Site by a temporary driveway off Allegan Street during these times.
